

Working with Families Affected by Substance Misuse

Delegates will learn about current drug misuse, their effects and how they can impact families. This is a thought provoking course that aims to give staff motivational skills for engaging with family members using best practice interventions and assessments. The trainer draws on personal experience of these issues demonstrating great passion about raising awareness of this hidden harm.

Course Content:

- Myths and facts
- Signs and symptoms of drug use
- Impact of substance misuse
- Assessing parenting capacity
- Roles and responsibilities of agencies

All delegates receive a delegate pack and a USB memory stick with training materials.
